At PRP Corp, we understand that every customer has unique colour needs. That's why we offer a colour matching service using our state-of-the-art colour spectrometer. Our team of experts can match your desired colour precisely and efficiently, ensuring that your project looks exactly as you envisioned it.

While our colour chart showcases our vast range of colour matching ability, we cannot guarantee an exact match to the colours shown due to variations in monitors, lighting, and other factors. Please keep in mind that the colour chart serves as a guide only and that the final colour may differ slightly from what is shown. To ensure the best match possible, we highly recommend using our colour matching service.
